

GymHub Dashboard — Complete Study Guide

This PDF contains JavaScript, CSS, HTML concepts and presentation notes for the GymHub Dashboard project.

JavaScript Concepts

Concept	Description
Async/Await	Used for handling asynchronous actions like save button loading.
localStorage	Stores theme preference even after refresh.
classList	Adds/removes CSS classes dynamically.
Event Listeners	Handles click/change interactions.

CSS Concepts

- CSS Variables for dark/light theme
- Flexbox and Grid layouts
- Media queries for responsiveness
- Transitions and animations
- Glassmorphism using backdrop-filter

HTML & Accessibility

Semantic HTML, ARIA attributes, accessible buttons, proper labels, and responsive viewport meta tags were used in the project.

Presentation Tips

1. Show dark/light mode first.
2. Explain async loading spinner.
3. Demonstrate responsive mobile layout.
4. Talk about accessibility improvements.
5. Mention bugs fixed in the original code.

Final Note

This study guide was generated automatically for GymHub Dashboard preparation.
